President's Desk

I can think of no greater compliment than being chosen by my own peers. Thank you for doing me the honour of electing me as your President.

I realised recently, that our organisation started almost fifty years ago, and it is remarkable how things have changed. From meetings at homes to the Creek Row office to the present office that boasts of a library, a seminar room and a vibrant website, I think we have done the founder fathers proud. However, now is not the time to rest on our laurels; but to seek to better ourselves in every aspect of our lives and our profession.

My greatest delight has been to witness the emergence of a high standard of orthopaedic service offered in the far flung areas of our state today. This has been the single most telling development that I have noticed since I started my career and as there seems to be no abatement in the pace of changes taking place, things can only get better.

My priorities would be in taking care of ourselves, our social and academic responsibilities I, like many of our colleagues, have been guilty of not spending enough time with the family. This difficult period has, paradoxically, given me an opportunity to redeem myself on that count. It has been, however, case of “too little too late”. I urge my younger friends to take advantage of this situation and rewire yourselves to have more quality time with the ones that count, especially when you get back to your normal crazy schedule.

If we don't take care of ourselves, who will? WBOA is determined to see that our near and dear ones get the best medical aid possible, as soon as they need it. Working in tandem will, of course, make it easier, and more effective.

We take our social responsibilities very seriously, and will carry on with our material and financial contributions whenever and wherever the need arises.

Changes offer challenges, and we are ready for them. There will be no let up in scientific and academic activities and, I promise, the content and quality will be just as good or better than they used to be. They may only be conducted differently.

As we reach the second half of 2021, I just want to say. Carry on the good work and our collective efforts will make a tangible difference. Do not drop your guards and do stay safe.

Dr. Kanchan Bhattacharyya
